

## Reference

**Product:** **Nanotol 2in1 Cleaner and Protector**

**Location** Munich

**Object:** Airport

Tests were carried out on glass, stainless steel, sandblasted glass and plastics with the product nanotol® at Munich Airport in July 2011.

**Sven Simon, Flughafen München GmbH, Facility Management:**

„The cleaning and evaluation of the tested surfaces in March 2012 has shown that surfaces coated with Nanotol were significantly cleaner compared to surfaces without coating. Cleaning the surfaces coated with Nanotol was even faster and easier. The cleaning company has the best benefit, since cleaning is considerably easier now.“
